Art Unit: 1711

1. A response (paper 16) and a declaration (paper 17) have been filed on January 16, 2003.

2. Claims under examination are still 1-10.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is indefinite in failing to specify what is the remaining portion of binder. As amended, the binder in this claim has 7.5% by wt of polymer and 8% by wt of starch. The total becomes 15.5%. What about remaining 84.5%?

5. Rejection of claims 1-10 (see item 4, of paper 15) is now withdrawn.

6. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

7. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen et al (US 5,928,588) in view of Canorro et al (US 6,586,520) and Baig (US 5,911,818).

(Baig has been cited in earlier Office actions.)

Chen discloses manufacture of porous structures. A tile can be viewed as a form of such a structure, which comprises three components (column 4, line 60 to column 5, line 6). Perlite is one of the components (column 5, line 11). Cellulose fibers and metallic fiber are another components (column 6, lines 59-66). Cationic charged resin is

Art Unit: 1711

also included (column 6, line 61). Components other than perlite can be used from about 0.1 to 90% by wt (column 7, lines 4-6).

Chen does not mention epichlorohydrin as a binder-polymer and starch.

Canorro discloses aqueous compositions comprising (A) a polyamidoamine epihalohydrin resin and (B) a material selected from flexibilizing material, cross-link inhibitors and their combinations (abstract). Examples of component (A) are listed in column 11, line 56 to column 12, line 5.

It would have been obvious to use the epihalohydrin resin of Canorro as a preferred binder for the structure of Chen because of its cross-linking ability resulting in enhanced mechanical strength of the structure.

Baig discloses an acoustical tile composition in which starch is used as a binder in combination with cellulose fiber and latex (column 6, lines 13-30).

Therefore it would have been obvious to add starch as a component in the structure of Chen to improve mechanical properties.

8. Claims 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen et al (US 5,928,588) in view of Canorro et al (US 6,586,520) and Baig (US 5,911,818) as applied to claim 1 above, and further in view of Symons (US 5,395,571).

(Symons has been cited in earlier Office actions.)

Disclosures Chen, Canorro and Baig are presented earlier. Together they fail to mention the retention aid (of instant claims 8-10).

Symons discloses a building board made out of a composition comprising sodium carboxymethyl cellulose (column 2, lines 33-34).

Art Unit: 1711

Hence it would have been obvious to use in the structure of Chen, the sodium carboxymethyl cellulose of Symons with the expectation of minimizing loss of ~~loss~~ binder due to the ability of the cellulose to thicken the composition. 

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
